

Investment Objective

The aim of the AIF is to preserve capital and seek to achieve a total return from a diversified portfolio of Bond, Debt Securities and equities. To achieve this objective, the assets of the fund are invested with the principle of risk diversification predominantly in debt securities although holdings in money market instruments, deposits, including but not limited to, fixed-term deposits at financial institutions, certify cates of deposit, commercial paper, medium-term notes, short-term treasury bills and call and notice accounts. Cash and cash equivalents may be held on an ancillary basis. Within the constraints of the regional and stage focus of the AIF, the Investment Strategy is generalist and opportunistic with respect to sectors, though there is a range of preferred sectors to be targeted.

The first stage of the investment decision process will involve extensive quantitative screening on the basis of a number of key parameters and proprietary valuation models. This method will allow the AIF to examine and filter a large number of companies and quickly identify potential investment targets, which will then be thoroughly researched and analysed to determine whether they meet the AIF's value criteria. Although global economic conditions and the state of financial markets internationally may impact all markets and regions to some extent, some markets react differently to the same set of conditions. The Management Company chooses to focus on the developed markets but will also consider investing in emerging markets that can present various opportunities even at difficult economic conditions.

Although global economic conditions and the state of financial markets internationally may impact all markets and regions to some extent, some markets react differently to the same set of conditions. The External Manager's chooses to focus on the developed markets but will also consider investing in emerging markets that can present various opportunities even at difficult economic conditions.

The total return of the AIF will be the result of interest income, changes in the market value of the AIF's investments and changes in the values of other currencies relative to the fund's currency which is the Euro.

Investor Profile

An investment in SELECT is designated to be a medium - to long-term investment. Investors should not expect to obtain short-term gains from such investment. SELECT is suitable for investors who can afford to set aside the capital for the medium to long-term and who seek an investment with a medium- to high-risk profile. The Sub-Fund may not be appropriate for investors who plan to withdraw their money within two to three years.

The reproduction or distribution of this document by any means is strictly prohibited. Wealth Fund Services LTD is authorized and regulated by the Cyprus Securities and Exchange Commission, decision 6/78-2012).

Market Commentary

In Q4 2023 both Equity and Bond prices rose significantly, on anticipation of interest rate reductions within 2024. Investors' focus shifted from the "higher for longer" rate narrative, to expect pre-emptive cuts from the Central Banks, following a series of softer inflation prints and dovish messaging in most regions. Q4 ended with strong performance for most major asset classes. Among Fixed Income assets, Corporate Bonds outperformed solidly the Sovereigns. Specifically:

United States: The FED kept the interest rates unchanged throughout Q4 while expectations resulted in a new asset price upward cycle with Technology, Consumer Discretionary and Real Estate outperforming versus the Energy Sector which underperformed due to declining energy commodity lower prices. The S&P 500 Index price rose by 11.23% QoQ and ended the year just short of its 2021 record high. Consumer Sentiment (Michigan Survey) and Investor Sentiment in the US both advanced in Q4. The BBG Global Agg. Bond Index price advanced by 8.10% QoQ, while the CRB Commodities Index price declined by 7.10% QoQ.

Europe & Rest of World: Most asset market prices had a strong final quarter of the year, with Eurozone's top equity performance led by Technology & Real Estate Sectors. Emerging Market (EM) equity prices x-China advanced decisively too, despite pressure early in the quarter due to the conflict in the Middle East. The ECB kept interest rates unchanged in Q4, supported by softer inflation figures from the Eurozone. China remained the worst performing Emerging Market QoQ.

Portfolio Strategy: Fund management raised risk in Q4 and as a result cash declined at 1,8%, -2,2pp QoQ. YTM stands at 6,3%, -66bps QoQ as bond prices appreciated and portfolio duration to 2,7 calendar years and is stable QoQ. Eurozone CORP Bonds are the main positions, standing at 78% of NAV with the US asset exposure on FX-hedged basis at 7,2% of NAV (-1,5pp QoQ). NAV per share appreciated by +5,9% QoQ, +42bps vs Benchmark Index (BI). For the FY2023 the Fund's price appreciated by 13%, +181bps versus its BI.
